

C.R.I. PUMPS

Pumping trust. Worldwide.

SUBMERSIBLE PUMPS AND MOTORS

50Hz

C.R.I. PUMPS

Pumping trust. Worldwide.

THE BEGINNING

of C.R.I., way back in 1961, was a resolute attempt to produce a few irrigation equipments using the limited facilities of an in-house foundry. Eventually the founder's dream was coming true as the small production unit he started kept growing rapidly. Now, after more than five eventful decades, it is an enormous, widely reputed organization, which produces more than 2300 varieties of perfectly engineered pumps and motors and sells its products in numerous countries spread across 6 continents.

C.R.I. IS ONE AMONG

the few pioneers in the world to produce 100% stainless steel submersible pumps. Having achieved a record production capacity of over 2 million pumps per annum, today C.R.I. is rubbing its shoulders with the best brands in the world, with advanced technology and safety standards as its hallmarks.

THE INFRASTRUCTURE

of C.R.I. is pretty comprehensive with state-of-the-art machineries and high potential in-house R&D recognised by the ministry of science and technology, Govt. of India - all within its own covered area of 300,000 square metres. The production environment is accredited with ISO 9001, ISO 14001 & OHSAS 18001 certifications and the products are CE, UR/UL, IEC, TSE & ISI certified. The R&D team always stays in tune with the changing scenario and seldom fails in coming up with outstanding solutions every time.

NEEDLESS TO SAY,

behind this legendary growth lies the untiring, innovative, enthusiastic and dedicated team work. and, of course, a flawlessly maintained value system too. The name C.R.I. itself encapsulates the company's ethos: " Commitment, Reliability, Innovation".

C.R.I. FLUID SYSTEMS

Pumping trust. Worldwide.

Vision, Mission and values

To be the industry leader providing best - in - class fluid management solutions to individual and institutional customers and societies in our chosen markets.

We will achieve this through our dedicated efforts to enhance the welfare of all our stakeholders and by living by our values of commitment, reliability and Innovation.

GENERAL INFORMATION

STAINLESS STEEL & SILVERLINE SERIES

PERFORMANCE CURVE CONDITIONS

The conditions below apply to the curves shown on the following pages.

- a. The Performance curve shows pump performance at rated speed, voltage and @ 3 metre minimum submergence.

The nominal speed of pump

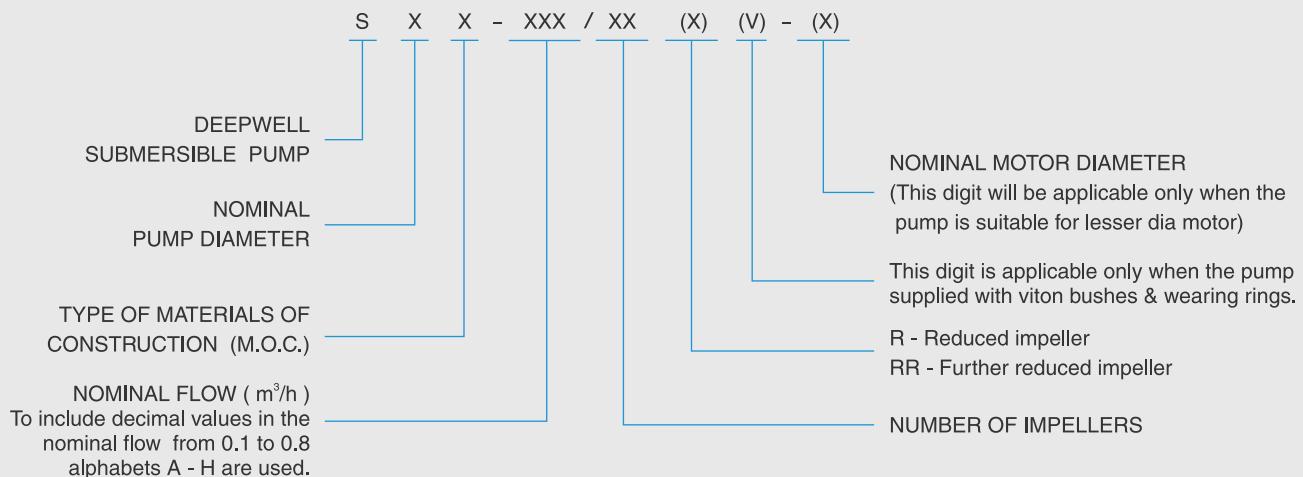

4"	:	n = 2900 rpm
6"	:	n = 2900 rpm
8" & 10"	:	n = 2900 rpm

- b. The measurements were made with airless water at 20°C. When pumping liquids with a density higher than that of water, motors with correspondingly higher outputs must be used.
- c. Pipe friction losses have not been included in the performance curves and performance tables.
- d. The bold curves indicate the recommended performance range.
- e. Q/H : The curves are inclusive of check valve and suction inter-connector losses at the actual speed.
- f. Efficiency curve: “η %” shows pump stage efficiency.
- g. Curve tolerance according to ISO : 9906, Grade -3B
- h. The performances are at rated voltage and are only Indicative. Actual discharge depends on availability of water in well, based on strength of water source, height of water column, submergence of pump, etc.,.
- i. All mounting dimensions are in accordance with NEMA / International standards.
- j. The outlet size of the pumps are as per BSP standard.

Submersible Pumps

C.R.I. Submersible Pumps are the products of the expertise gained from over five decades of experience, endurance and workmanship. These products are engineered to perfection with utmost care and stringent quality control at all stages to ensure a trouble free service.

Description : C.R.I. 4", 6", 8" & 10" Stainless steel series submersible pumps are made of corrosion resistance stainless steel with built in check valve. All vital components of these pump models are made of high quality 304 / 316 grade stainless steel and the shaft is of S.S 304 / 329 / 431. The optimal design of impellers and diffusers enables the best possible hydraulic efficiency.

These pumps are of multistage centrifugal type, which can be firmly coupled to a submersible electric motor, which operates submerged beneath the surface of water. Built in check valve prevents back flow, and reduces the risk of water hammer. All mounting dimensions of pumps and motors are in accordance with NEMA standards. C.R.I. submersible pumps can be offered with either C.R.I.'W' series, water filled rewirable submersible motors / C.R.I. 'R' series, Resin Filled encapsulated (water lubricated) submersible motors / C.R.I.'L' Series, Non-toxic liquid filled submersible motors or any other NEMA / International standard motors.

Features :

- Best operating efficiency
- Precise parts made of SS 304/316
- Highly durable & Hygiene
- Can be easily dismantled and repaired
- Can handle maximum upthrust loads in its category
- Additional intermediate bearings support in higher stage pumps
- SS 329 spline coupling for longer life

Applications :

- Residential
- Irrigation
- Gardens
- Golf Course
- Fountains
- Industrial & Rural community water supply
- Sprinkler irrigation Systems
- Oil & Gas
- De-watering in mines

OD for all combinations of motor & pump. (247mm - Single Cable Guard. 255mm - Double Cable Guard)

* 1 denotes Single Cable Guard (D.O.L - 3 wire) and 2 denotes Double Cable Guard (S.D - 6 wire). Please specify preference, while placing order.

** In pump model last digit R denotes reduced impeller OD and RR denotes further reduced impeller OD

In view of continuous developments, the informations / descriptions / specifications / illustrations are subject to change without notice.
Refer general information for performance curve conditions and for other details. Curve tolerance according to ISO : 9906, Grade 3B

STAINLESS STEEL SERIES

Nominal Diameter : **10"**Nominal Flow : **215m³/h**Outlet Size : **6"**
